PERSONAL PROJECTS

Appert LIMS

- Appert is the world's first open sourced Food Microbiology Information Management System (LIMS). Appert is capable of tracking scientific samples as they progress through the testing process. Customizable administrator, analyst and customer roles keep sensitive information secure. See it live at www.appertlims.com

StraViewer

- Visualize all your Strava activities in one spot! Log in with your Strava Credentials and StraViewer automatically downloads your activities. A user-friendly ReactJS interface makes viewing previous activities a breeze. Easily sort activities by year and month. Find out who's running in your area.

ACHIEVEMENTS

Open Source Contributor

Evaluated, modified and submitted pull requests on several popular Open Source projects. Improved project readability. Contributed an open source tutorial on how to clean data, automate tasks, and interact with APIs in Ruby
